

Recycling Made Easy for the Healthcare Industry

No-Hassle, On-Site Recycling for Rechargeable Batteries and Cell Phones

Concern over the ecological footprint of healthcare facilities has stimulated a growing movement to properly handle electronic waste in hospitals, clinics and other medical sites.

How Does Recycling Work?

Call2Recycle® provides all collection containers and collateral materials, and pays all shipping and recycling costs. Participants receive detailed collection reports and Certificates of Recycling. The transport and recycling of used rechargeable batteries and cell phones are in full compliance with the U.S. DOT and the Universal Waste Rule.

Batteries We Accept

Rechargeable batteries can be found in cordless tools or instruments, cellular and cordless phones, laptops, portable defibrillators, heart monitors, x-ray machines, wheelchairs, medical beds and crash carts.

Call2Recycle is the only free rechargeable battery and cell phone collection program in North America. Participation is **FREE** and **EASY!**

How Can I Join?

Call 1-877-2-RECYCLE or visit call2recycle.org today!

Benefits of Call2Recycle®

- It's Free
- Detailed Tracking & Reporting, including Certificates of Recycling
- Accessible Customer Service
- E-Stewards Qualification by the Basel Action Network (BAN)
- Full Compliance with U.S. Dept. of Transportation Regulations
- Over 50 million pounds of batteries recycled

Why Join?

There are many benefits to becoming a collection site:

- **Project a green image** - Demonstrate your commitment to preserving the environment.
- **Decrease Ecological Impact** – Healthcare facilities accumulate tons of waste each day.
- **Convenient for Staff** – All collections are conveniently performed on campus.
- **Conserve Natural Resources** – Reclaimed battery components can be used to make new products.
- **Completely Free** – Collection, shipping and recycling is completely free to your facility.
- **Accessible Customer Service** – Easy phone, email and web access to customer support.
