

Kamryn Kubose

Intern

California Product Stewardship Council

Kamryn Kubose is a recent graduate from University of California at Los Angeles (UCLA) with a Bachelor's in Environmental Science. At UCLA, she served as a project manager for the student-run club, Bruin Home Solutions, oversaw a campus restroom water audit program, and hosted a LEED Green Associate training course for 60 students.

Additionally, she worked closely with the Deputy Chief Sustainability Officer at UCLA on campus-wide sustainability reporting (AASHE STARS) and assisted sustainability initiatives including LEED Labs and a campus living map for energy, water, waste data.

Following graduation, Kamryn interned at an architecture and urban design firm, Studio One Eleven, in Long Beach under the Sustainability Director. She was able to put her LEED Green Associate credential to practice here as she worked on LEED documentation for a major renovation project in San Diego and a ground-up office in Los Angeles. She enjoyed learning about extended producer responsibility and sustainable materials. After her internship ended, she moved back to her hometown of Fresno where she was chosen to be a Climate Corps AmeriCorps Fellow with the Office of Community and Economic Development at California State University, Fresno, hosting workshops for the Measure C Agricultural Worker Vanpool Program, coordinating the San Joaquin Valley Blueprint Awards, and assisting the San Joaquin Valley Housing Collaborative staff. Kamryn joins CPSC as an intern working on a variety of projects, such as the California Drug Take-Back Program, CalRecycle Hazardous Waste projects, and policy advocacy for producer responsibility. Email Kamryn at kamryn@calpsc.org and connect on [LinkedIn](#).
