

## FLOOR ALERT: SUPPORT FOR ASSEMBLY BILL 1371 (FRIEDMAN)

### *Plastic Film in E-Commerce*

Joint Authors: Gonzalez and Ting

Principal coauthors: Bloom, Carrillo, Kalra, and Allen and Stern, Coauthors: Quirk, L Rivas, Stone and Wiener

Passed Assembly Natural Resources (8-3) | Judiciary (8-2) | Appropriations (12-4)

AB 1371 will require a shift to non-plastic packaging that is recyclable, compostable, or reusable and accepted in curbside bins. ***This is possible because it is already being done in other countries and practical packaging alternatives are already used here in California (see back).***

As worldwide e-commerce continues to increase in volume, it is essential that the state establish provisions ensuring packages sent in and into the state are packaged sustainably and responsibly. Additionally, consumers have expressed concerns with the plastic packaging their orders are shipped in and want plastic-free choices. AB 1371 also extends the sunset on an existing requirement that establishments that provide carry out and/or durable plastics bags provide a collection bin for the purposes of collecting and recycling those bags.
